GRANITE

WHAT IS GRANITE?

The word "GRANITE" comes from the latin "GRANUM", a grain, in reference to the coarse-grained structure, composed by extreme metasomatism fluids bringing fractional crystallization serves transform in elements such as potassium, calcium, magnesium, titanium, feldspar and quartz. Granite is the hardest building stone, massive and durable extensively used as a dimension stone and as flooring tiles in public and commercial buildings, also popular choice for kitchen and countertops.

APAKAH GRANIT ITU?

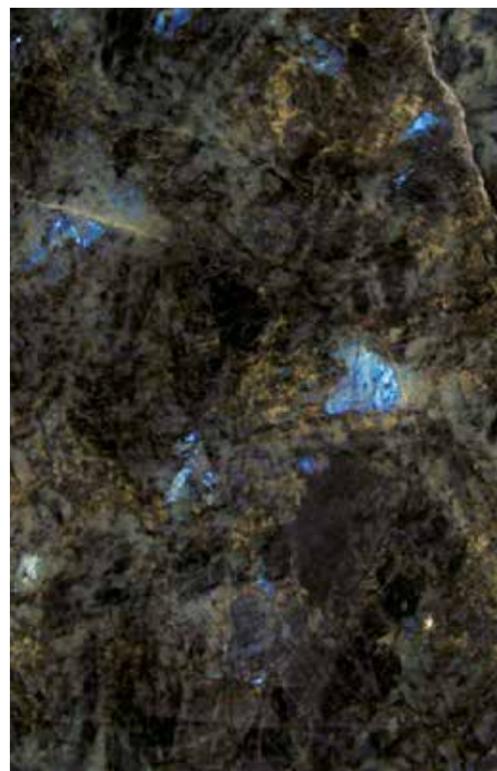

Kata "granit" berasal dari bahasa latin "Granum", biji-bijian, yang mengacu pada struktur kasar, disusun oleh cairan metasomatisme ekstrim membawa kristalisasi fraksional dan mengubah elemen seperti kalium, kalsium, magnesium, titanium, feldspar dan kuarsa. Granit adalah batu bangunan paling keras, besar dan tahan lama yang banyak digunakan sebagai batu dimensi, ubin lantai di gedung publik dan komersial, dan juga merupakan pilihan populer untuk dapur dan meja.

WHAT IS MARBLE?

The word "MARBLE" derives from the Greek "marmaros", as "shining stone"; Italian "marmo", Dutch "Marmer"; French "Marble"; Spanish "Marmol". Marble is a natural process of heat and pressure formed from limestone or dolomite rock, this forces cause to change natural design in texture, pattern, and color, this process is called re-crystalline stone.

The minerals resulted from impurities give marble a wide variety of colors. Pure white marble is the result of metamorphoism of purest limestone or dolomite. Reddish color is due containing hematite. Yellow color is the limotite, Green is often due to serpentine.

APAKAH MARMER ITU?

Kata "MARBLE" berasal dari bahasa Yunani "Marmaros", sebagai "batu yang bersinar"; Italia "marmo", Belanda "Marmer"; Perancis "Marble"; Spanyol "Marmol". Marmer adalah proses alami dari panas dan tekanan yang terbentuk dari batu kapur atau batu dolomit, pasukan ini menyebabkan mengubah desain alami tekstur, pola, dan warna, proses ini disebut peng-kristal-an pada batu.

Mineral yang dihasilkan dari kotoran memberikan berbagai macam warna pada batu marmer. Marmer putih murni adalah hasil dari metamorphoism batu kapur murni atau dolomit. Warna kemerahan karena mengandung hematit. Warna kuning adalah limotite itu, Hijau sering disebabkan serpentine.
